ACT IV · CHECKS THAT RUN

Sweeps: the added lines, run through search rules

```
$ review-loop sweeps HEAD~20 HEAD
[json-parse] throws on bad input: is the parsed
  shape checked before use?
  js/assist.js:38:  JSON.parse(localStorage.getItem(...))
[new-listener] is there a matching removal?
  js/secretCode.js:191:  document.addEventListener(...)
diff-sweeps: 15 question(s) for the author (warn-only)
```

No model, no cost. Each hit is a question.

Run on Neon Smash (github.com/kenchris/soma-breakout), last 20 commits, output shortened.
