ACT IV · LEVEL 1

# Ask for a review

```
/pre-pr-review
/pre-pr-review 123
/pre-pr-review main..my-branch
/pre-pr-review multipass
```

The current branch, a pull request, a range, or three readers and a vote. Fix what it finds and run it again.

These are typed to the agent (Claude Code, or VS Code), not to a shell.
