ACT IV · LEVEL 2

A REVIEW.md for a small game

```
## What a failure is here
- Touch and keyboard doing different things
  for the same input.
- A rule CLAUDE.md describes and the code
  does not do.

## Guards: read in full
- js/secretCode.js  (once per game, never
  in a boss fight)
- sw.js  (a stale cache serves an old game)
```

Short on purpose. A reviewer that has to read a long file reads it badly.

REVIEW.md written for Neon Smash for this talk.
