ACT IV · CHECKS THAT RUN

The gate: "reviewed" becomes a rule

```
$ review-loop gate main HEAD
FAIL: 1 commit(s) are in no review report
  with Open: 0, for example:
  b23e6f4 Add request handler
STOP: run the multipass review and fix
  or explain every finding

$ review-loop gate main HEAD~1
review gate: all 1 commit(s) covered by reports
```

A report in reviews/ with Open: 0 must cover every commit.

Run on the example change made for this talk.
