ACT VI · LEARNING

What /retro said about a real round

Three

The lens covered it, the reader skipped it.

One

A one-line search would find it: a pointer cast with no family check.

One

A deleted test file nobody had noticed.

Result

A ranked list of changes, instead of nine fixes that teach nothing.

The Copilot round from slide 7: nine comments, eight right. The README does not break down the other three.
