ACT VII · FOR MANAGERS

What to measure

MEASURE	WHERE IT COMES FROM
Human comments, and the time a PR waits on a person	Your tracker. review-loop does not measure it
Recall and noise of the review	`review-loop eval report`
Outside findings per round: the number should fall	`review-loop score show`
Reverts and incidents: the guardrail	Your data. Turn each into an eval case

The measures are from Osmani, Lunt and Wang, 15 October 2026. The right column is review-loop's README.
